Tokatsu Techno Plaza Research Center Established - Seminar Notice

Ecodesic Company, Ltd.
CEO Hideki Goto

Ecodesic is pleased to announce the opening ceremony on May 28, 2018 of the Ecodesic Tokatsu Techno Plaza Research Center, including a seminar to explain Agrofactor Technology and other topics.

Ecodesic Co., Ltd. provides plant factory systems (otherwise known as vertical or indoor farms) using innovative Agrofactor cultivation technology. Agrofactor is greatly different from cultivation techniques used in typical plant factories; it realizes exceptionally fast and productive cultivation and is a profitable technology.

To continuously improve cultivation technology and systems for the future, we have been building our research facility to develop research on plant factory systems located at the SME incubation facility "Tokatsu Techno Plaza" in Kashiwa City, Chiba prefecture.

On top of your busy activities, we hope and look forward to your participation. In addition, we have secured about 20 parking spaces at the Tokatsu Techo Plaza. However, as there are limited numbers we request that if at all possible please use public transportation.

Notice:

Date and time: May 28, Monday, 14:00 to 16:00 (Doors open at 13:30)
